

Web-Based RTT Training

Improve waiting times performance and reduce risk of clinical harm through RTT training!

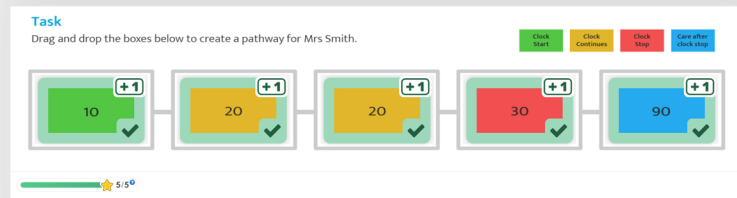

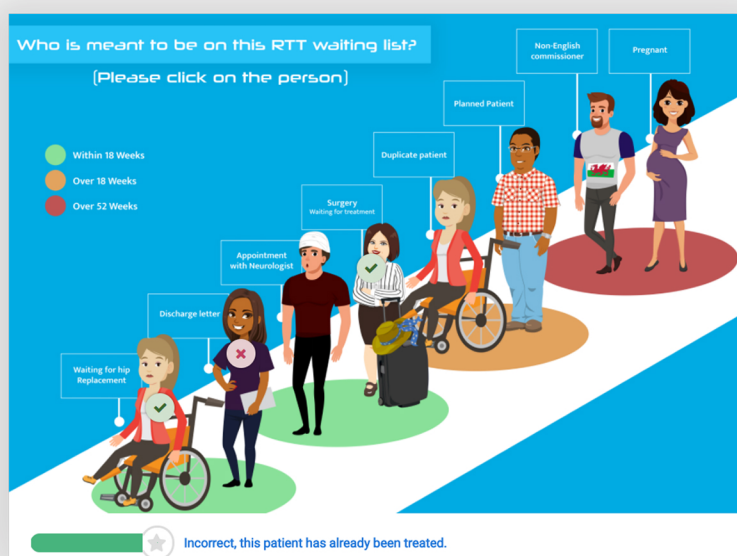

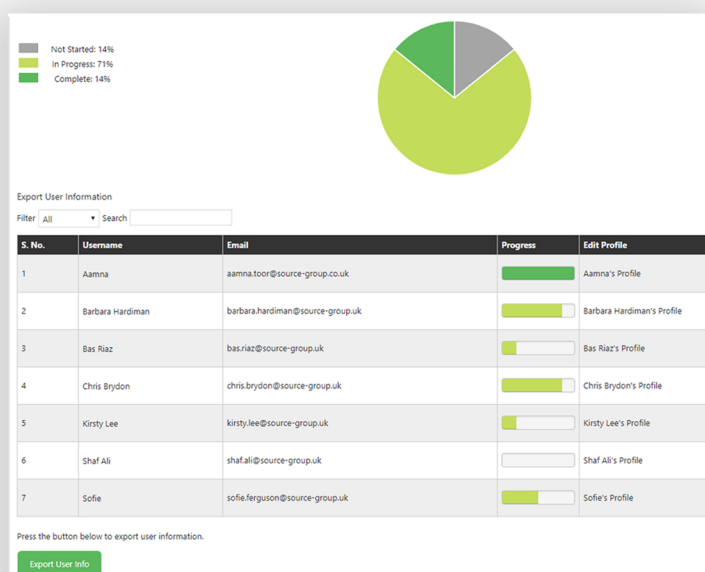

Strong RTT knowledge can improve data quality and waiting list accuracy, improving waiting times performance and reducing risk of clinical harm.

Learn RTT ensures your staff have an excellent understanding of RTT.

Learn RTT is the only CPD accredited RTT training available, sustainably improving your waiting list accuracy by providing staff with the knowledge to **Get it Right First Time!**

Optimise Patient Care

- Improve waiting times performance
- Increase waiting list accuracy
- Minimise risk of clinical harm
- Drastically reduce requirement for validation, lowering costs and freeing up budget for clinical activities

Monitor and Manage Progress

Learn RTT is a complete Learning Management System, providing full visibility of staff training progress, ensuring the desired training outcomes are achieved.

- Complete Learning Management System
- Monitor and manage staff progress, performance and completion
- Comprehensive assessment to measure retention of knowledge
- Data can be exported and uploaded to the Trusts ESR

Web-Based RTT Training

Improve staff RTT knowledge

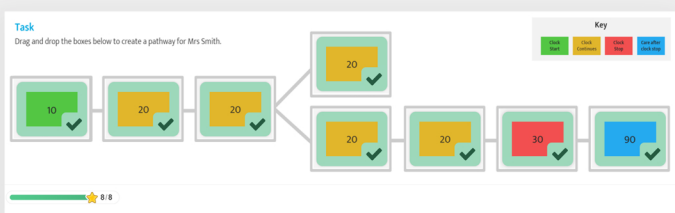

In order to maximise RTT knowledge retention, it is important for staff to be focused, engaged and incentivised when training. Learn RTT provides:

- 4 courses tailored to specific staff knowledge requirements - ensuring content is relevant
- Engaging, stimulating, interactive content – 10 different interactive activity types
- CPD points awarded for successful course completion – incentivising participation
- Modular training - saving progress and allowing for 'bitesize' learning

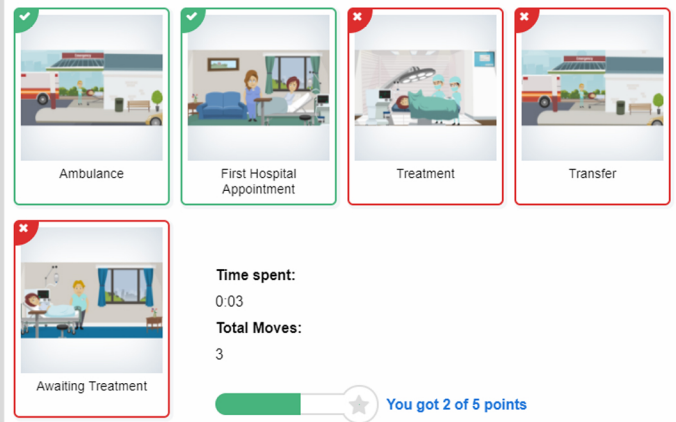

Rapidly deployable and easy to use

Learn RTT can be rapidly mobilised on a large scale, and is very user friendly, meaning your staff can begin learning right away!

- Intuitive user interface and structure
- Individual accounts provided for each user
- Staff train at their own pace, within their own environment
- Rapidly deployable – no software installation required
- Cloud-based – accessible by PC, tablet and mobile
